Hybrid  
Matrix

July 2022 (v1.0)

# Hybrid Matrix Intro

The hybrid matrix rewards any person that commits to working the MetFier Rewards Program, **no matter when they get started**. Forced compressed matrixes reward timing over work ethic making it unfair and much more difficult for people starting later to earn more than the early adopters.

This hybrid matrix makes it possible for a person to start in 1 or 2 years and **earn more rewards than the early adopters**, especially those that don't work the MetFier Rewards Program. This makes it a very attractive program **today, next year, 5 years, and more** into the future.

## Simple System

1. Buy **NFT #4 Fish**
2. Personally **refer 5** people that buy **NFT #4 Fish**

Completing **step 2** in your **first 30 days** qualifies you to earn a **50% Matching Reward** on all of your **personally referred members matrix & token staking reward income, for life**, even personally enrolled members that buy an NFT after your first 30 days and after your matrix is full, even when they overtake you in a higher matrix.

## Gifting NFTs

Use the gift function inside the app to ensure that a person is personally referred by you - **no need for referral links when you gift**. Allocate a modest marketing budget of BUSD and BNB to your wallet and **gift NFT #1 Shrimp to 5-10 people** by asking for their wallet addresses.

Then guide them through the app and show them how to upgrade themselves to Fish or higher and teach them to do the same as duplication is key. Go to **Help > Marketing** and read the **MetFi Starting Right** guide.

## NFTs and Matrixes

There are 10 NFTs and 10 Matrixes. Each **NFT (1-10)** opens a new 3 x 10 **Matrix (1-10)**. If any team member, in any of your matrixes, including your personally referred members buys a higher NFT than you they can permanently overtake you in the higher matrix(s). You can later overtake them if you upgrade to a higher NFT before them which is explained in the **hybrid example scenario** below.

The smart strategy is to **upgrade to higher NFTs as soon as possible** to minimize the chance of being overtaken and missing out on MetFier Rewards. If you are qualified for **50% Matching Rewards** you will always receive 50% of your personally referred members' Matrix Rewards even when **they own a higher NFT than you and even if your matrix is full.**

Each of your matrixes will begin to look different from the next matrix because different members will upgrade and buy higher NFTs at different times.

The hybrid matrix allows you to **take your personal referrals and their personal referrals** along with you into **higher matrixes** as they **upgrade through the matrix levels with you.**

Before upgrading NFTs it would be respectful to tell your referrer so they have an opportunity to upgrade NFTs before you and retain the integrity of the matrix and lines of referrals. This is a nice thing to do but it is not mandatory.

The ability for a new member to join at any time in the future, open new matrixes, upgrade NFTs whenever they want, qualify for a 50% Matching Bonus, personally refer as many members as they want, and bring those members along with them into higher matrixes is what makes it possible for any member starting next month or next year to **earn more rewards than an early adopter** and this is what makes the **Hybrid Matrix fair, unique, powerful and sustainable for the long-term.**

## Hybrid Personal Referrals & DAO Matrix

When you personally refer a new member that buys an NFT, or when they upgrade NFTs the smart contract looks for the **first available matrix position to place all of the NFTs** that they have purchased. If you own all of the NFTs that they purchase all of their NFTs will be placed in the first available position in your matrix.

If they buy a higher NFT than you the smart contract will look for the first available position in **your referrers** matrix and if your referrer owns that NFT it will be placed in the first available position in their matrix.

If your referrer **does not own** that NFT the smart contract will keep searching for a match through **5 levels of personal referrals above you.** If a match cannot be found by the 5th level the higher NFT purchase is placed in the **first available position in the DAO Global Matrix.**

The DAO Global Matrix is **an NFT #10 Humpback** and it occupies **the #1 position in all 10 matrixes and earns MetFier Rewards** just like any other NFT can. All **MetFier Rewards** that it earns **go to the Treasury which is owned and controlled by MetFi NFT holders.** All NFT holders own a proportional share of the **DAO Global Matrix Humpback.**

There is a very helpful visual guide called the [Matrix Trainer](#) in the Help section inside the app.

Let's go through an example scenario.

## Hybrid Example Scenario

Let's say that you **buy NFT # 1 Shrimp to # 5 Dolphin** in one transaction. The smart contract will look for the first available position to place all 5 of your NFTs.

**NFTs #1 and # 2** - your **referrers' highest NFT is #2 Crab** - your **NFT #1 and NFT #2** are placed in the **first available position in your referrers' Matrix 1 & 2**.

**NFT #3** - your **2<sup>nd</sup> referrers' (your referrers referrer) highest NFT is #3 Octopus** - your **NFT #3** is placed in the **first available position in your 2<sup>nd</sup> referrers' Matrix 3**.

**NFT #4** - your **4<sup>th</sup> referrers' highest NFT is #4 Fish** - your **NFT #4** is placed in the **first available position in your 4<sup>th</sup> referrers' Matrix 4** - (3<sup>rd</sup> referrer did not own NFT #4 and was bypassed).

**NFT #5** - your **5<sup>th</sup> referrer DOES NOT own NFT #5 Dolphin** - your **NFT #5** is placed in the **first available position in the DAO Global Matrix 5**.

**N.B:** now let's imagine that **one of your personal referrals** upgrades to **NFT #6 Shark** - that members Shark will **overtake you and your 1<sup>st</sup>, 2<sup>nd</sup>, 3<sup>rd</sup>, and 4<sup>th</sup> referrer** in Matrix 6 and will be positioned in the **first available position in the DAO Global Matrix 6**.

The hybrid matrix rewards members that are committed to working the MetFier Rewards Program and upgrading to higher NFTs as soon as possible, no matter when they get started and that's what makes it fair, unique, powerful, and sustainable.

## FAQ

### If I personally refer a member and they personally refer a member will their personally referred member be in my matrix?

In this case, we are talking about personal referral lines so yes, they will be in your Matrix 1 because **all members are in Matrix 1** as it corresponds to **NFT #1 Shrimp**, the **entry-level NFT**, and **Matrix**.

The only exception is when your **Matrix 1 is full** and it grows to your **11<sup>th</sup> level and below** and while you won't receive Matrix Rewards from level 11 and below the smart contracts keep tracking all activity, including the **personal referral lines** as this is needed to calculate all **Matrix Rewards**, which then calculates the Matching Bonus Rewards which generate rewards for you on **all matrix levels**, even level 11 and below.

Furthermore, they will always be in your other matrixes **IF you own the corresponding NFT** when they purchase it. For example, if you own **NFT #4 Fish** and **they upgrade to NFT #5 Dolphin they will permanently overtake you in Matrix 5** but they will be below you in Matrixes **1, 2, 3, and 4**.

Let's now imagine that **you upgrade to NFT #8 Whale - IF they later upgrade to NFT #8 Whale** they will once again **be below you in Matrixes 6, 7, and 8**, but because they **overtook you in Matrix 5 you will also never have their Matrix 5 team below you** because when you **upgraded to NFT #8** you were positioned in the **first available position of your personal referrer** or their personal referral line **up to the 5<sup>th</sup> referrer**.

### Why am I seeing one members NFT in one or more of my matrixes and not in other matrixes?

This is because **you own a higher NFT than they do**. For example, let's say that **you own NFT #8 Whale** and their highest NFT is **#5 Dolphin** – you will see them in **Matrixes 1, 2, 3, 4, and 5** but you will **not see them in Matrixes 6, 7, and 8** because they have not purchased NFT #6, #7, and #8.

**N.B:** as your matrix grows their NFTs will appear in **different positions in each of your matrixes** because the smart contracts are always looking for the first available position in each matrix.

## Why has an NFT seemingly appeared out of nowhere in one or more of my matrixes?

This is the magic of **teamwork!**

Remember, any member can **personally refer as many members as they wish**. You can refer 10, 100, 1000, or even **10,000 members** - there is literally no limit.

There is most likely one or more members above you in one or more of your matrixes that is seriously working the MetFier Rewards Program. **When members above you are filling their own matrix(s), they may also be filling yours at the same time if you are in their matrix.**

**N.B:** there are no guarantees that this will happen so think yourself lucky if it does. To try and make it happen for other members in your matrixes while helping yourself **set a goal to personally refer as many members as you can as quickly as you can.**

Now imagine a member **personally enrolling 100 members** and then think about how the smart contracts **position NFTs in matrixes**. The **1<sup>st</sup> level of your matrix only has 3 positions** so the other **97 NFTs will begin filling your level 2 and level 3 as well other members' matrixes** and it's wonderful when that happens.

Each matrix is a 3 x 10 structure meaning:

- only **3 NFTs** can be placed on **level 1**,
- only **9 NFTs** can be placed on **level 2**,
- only **27 NFTs** can be placed on **level 3**,
- only **81 NFTs** can be placed on **level 4**,
- only **243 NFTs** can be placed on **level 5**,
- only **729 NFTs** can be placed on **level 6**,
- only **2,187 NFTs** can be placed on **level 7**,
- only **6,561 NFTs** can be placed on **level 8**,
- only **19,683 NFTs** can be placed on **level 9**, and
- a whopping **59,049 NFTs** can be placed on **level 10**

**adding up to 88,572 NFTs that can be placed in any of your 10 Matrixes.**

Once each level of your matrix is full the smart contracts must place new NFT sales on the next level and this can benefit other members below you.
